

Print and encode your cards **on both sides!**

The high-performance, dual-sided color printer to personalize cards individually or in bulk

Dualys³

Dualys3 is the benchmark printer to personalize cards in medium to large runs, or to instantly issue sophisticated cards.

Dualys3 matches premium-quality graphics, with fast throughput and autonomy. The printer comes with the latest innovations in consumables and encoding, and therefore, supports any type of cards while providing premium and unmatched efficiency.

AUTONOMY AND EFFICIENCY

Dualys3 comes with a feeder and an output hopper, both with a capacity of 100 cards. These features make the printer ideal to deliver cards in medium to large runs. With a stunning throughput of 125 cards per hour in dual-sided mode, **Dualys3** guarantees a smooth process with minimum user intervention.

Dualys3 also has a manual feeder that turns it into a card-by-card printer.

APPLICATIONS

Healthcare organizations, educational institutions, banks, governmental agencies and service bureaus rely on **Dualys3** to issue:

- Payment cards
- ID cards
- Student IDs
- Secured access control badges
- Driver's licenses
- Transit passes

BENEFITS

■ Premium performances

For dual-sided color printing (YMCKO-K), **Dualys3** stands out from the crowd as one of the fastest printers in its category, providing high-quality graphics, whether in color or in monochrome. With its dual-sided printing engine, Dualys rises to meet any ID need the user may have.

■ Sophistication in cards

Dualys3 benefits from world-class technology that supports the most stringent standards to encode magnetic stripes, as well as contact or contactless smart cards. For example, **Dualys3** delivers student IDs loaded with features: e-purse, access control to premises, transit pass, payment at the cafeteria and access to libraries.

■ State-of-the-art technology

Dualys3 has been designed to offer a wide variety of options to its users. Its internal USB hub makes it possible to connect specific encoders, while the USB and Ethernet TCP/IP ports make it possible to network it and link it to systems operating with Windows, Mac OS X or Linux.

A kiosk version is also on hand to set up self-service terminals.

A programming guide and development kits are also available for developers.
